

Commercial Installation SHOWCASE

The Preserve at Godley Station Southeastern Georgia

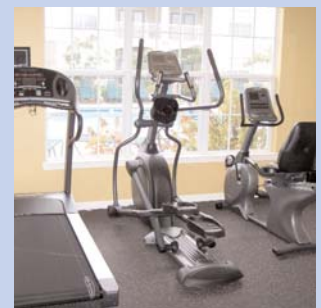

Opportunity

The Preserve at Godley Station, a luxury apartment community located in southeastern Georgia, was looking to make some changes to set themselves apart from several new properties that were being built in the area. They had two fitness rooms with older, well-used equipment. The Preserve management team decided it was necessary to upgrade these rooms for better appeal to potential residents. Vision Fitness contacted management and looked forward to helping The Preserve meet their goals!

Resolution

After discussing everything from room layout to paint color for the walls, Vision Fitness set everything in motion to get the fitness rooms at The Preserves ready for introduction to their residents. The two fitness rooms were set up with high-quality, mocha-flaked rubber flooring and a full line of Vision Fitness® cardio equipment and multi-station gyms. Included with the cardio equipment was an entertainment package to help keep residents motivated and encouraged to stay healthy! Vision Fitness handled local sales, installation, and service.

There was still one more thing to take care of before everything was complete. What happens to the old equipment? Vision Fitness was more than happy to help with the donation of the old equipment to a local YMCA. Not only was management at The Preserve happy with their new, state-of-the-art facility, but local YMCA members have a better opportunity to get healthy! It's a win-win situation!

"In need of having two fitness centers completely refurbished, I gathered several bids, Vision Fitness offered by far the best price for quality of product, and the best warranty. From day one, the Vision Fitness representative was prompt, professional, and very intuitive to our needs. Vision Fitness has gone beyond our expectations and continues to do so, long after the installation!"

Tena, Manager
