R2200	Semi-Recumbent Fitness Bike	Nov./Dec. 1996
R2200	Semi-Recumbent Fitness Bike	Sept./Oct. 1995

### Leading Consumer Magazine, February 2010 “Best Buy”

**T9250**  
“The solid, no-frills **T9250** beats the competition on warranty and storability. Unlike other fold-up treadmills, this model folds straight up and has four wheels, which means that you can move it to a closet.”

### Canadian Running, January/February 2009 T9600 Deluxe

“Vision builds treadmills with the option of buying each model in three different configurations: Simple, Deluxe and Premier. The three models reflect the complexity of the console features, allowing runners the option of buying the same quality treadmill at a lower price if they forego computerized bells and whistles. The durable 3-horsepower motor pumps out plenty of speed, while the orthopedic belt and eight variable-durometer elastomers reduce impact.”

### Runner's World, January 2007 T9600 Premier

“Testers loved the quick-speed and incline buttons which let them easily select their level and go with the Vision Fitness **T9600** Premier ... This is perhaps the best value in a home treadmill we've seen.”

Our company began as a division of Trek® Bicycle Company over 15 years ago, where we pioneered the development of the best fitness bikes in the industry. Today, as part of Johnson Health Tech NA, one of the largest fitness equipment companies in the world, we stay true to our heritage and offer the best quality, value, and customer service you will find.

## simple

Vision Fitness makes it easy to fit a workout into your schedule. Our consoles are intuitive—just press “Start” and go. Our motivational programs are simple to navigate and have been designed by experts to produce real results. Achieve your goals with plenty of feedback from the easy-to-read display windows.

We make it simple for you to fit Vision Fitness® treadmills into your home with our space-saving **T9250** and **T9550** models. Both models fold easily and feature our exclusive “drop assist” system, which helps support the weight as the treadmill deck is lowered and lifted.

One of the many tools we use to test treadmill life.

## reliable

Reliability is about what’s under the hood. Start with our drive systems. We build and rigorously test all key components ourselves—both to ensure top quality and that they work together properly. We then case our motors in large, well ventilated compartments to keep the system running cooler and more efficiently.

Our decks and rollers are built for the long haul. We wax our decks, rather than use a cheaper silicon alternative, because prewaxed decks run for hundreds of miles without service. We then keep our belts aligned with high-quality, 2.5-inch crowned rollers, belt guides, and adjustable feet to extend belt life.

## comfortable

Elastomers provide the support and cushioning that make up a treadmill suspension system. At Vision Fitness, we use elastomers of varying densities to create our “variable cushioning system.” This means that the level of cushioning and support varies throughout the deck, like it does on a quality running shoe.

The **T9250** and **T9550** can be folded to take up less space.

Where your foot strikes the belt, we put softer elastomers to absorb the shock. Where your foot pushes off, we make it firmer for more support. We add even more comfort by making an orthopedic belt standard on our higher-end models.

## get exactly what you want

Vision Fitness configured our folding and non-folding treadmill frames so that they can be matched with any of our three console options. Simply choose the console that meets your needs, and add it to the frame that offers what you want. The result is the perfect treadmill for you!

19600

### 1 choose your console

Key features found on all Vision Fitness® home treadmill consoles:

- quick start button allows you to simply press and go
- speed and elevation quick keys provide easy, single touch adjustments while working out
- accessory tray w/integrated reading rack holds your cell phone, remote control, or mp3 player
- ergonomic handlebar with contact heart rate
- easy-to-read display
- elevation, time, distance, calories, speed, pace, and heart rate readouts

## 2 select your frame

Key features found on all Vision Fitness® home treadmill frames:

- 2.5-inch crowned rollers reduce wear on the belt and help keep it centered
- one-inch prewaxed phenolic deck adds durability and longevity
- non-slip side rails grip your shoes for added safety and comfort
- variable cushioning system provides cushioning and support right where you need it
- side handlebars give added support
- front transport wheels allow easy movement
- large, ventilated motor cover keeps the system cooler for a longer life
- metal end caps will not break like most plastic end caps
- belt guides help the belt track properly

### T9200

non-folding

- heavy gauge steel frame
- 2.5 hp digital drive system
- 54" x 20" workout area
- 2-ply belt
- 2.5-inch crowned rollers

### T9500

non-folding

- heavy gauge steel frame
- 3.0 hp digital drive system
- larger 57" x 20" workout area
- 4.4 mm orthopedic cushioned belt
- higher maximum speed of 12 mph

### T9600

non-folding

- extra-heavy gauge steel frame
- 3.0 hp digital drive system
- larger 60" x 20" workout area
- 4.4 mm orthopedic cushioned belt
- increased elevation range of 0 to 15%
- reversible deck

### T9250

folding

- heavy gauge steel folding frame
- 2.5 hp digital drive system
- 54" x 20" workout area
- 2-ply belt
- 2.5-inch crowned rollers

### T9550

folding

- heavy gauge steel folding frame
- 3.0 hp digital drive system
- larger 57" x 20" workout area
- 4.4 mm orthopedic cushioned belt
- higher maximum speed of 12 mph

## big results in little time

Fit in a workout anytime with our SPRINT 8® program, medically proven to give you the best 20-minute workout possible. This unique program, found exclusively on Vision Fitness® products, was developed with Phil Campbell, MS, MA, and author of *Ready, Set, Go! Synergy Fitness*. Mr. Campbell is an expert in the field of anaerobic exercise, which has been cited by numerous medical publications as the cure for the “middle-age spread” or the energy decline, weight-gain, loss of muscle, and wrinkled skin we experience after age 30.

Learn more about the body-fat-cutting, muscle-toning, anti-aging benefits of SPRINT 8 at [www.visionfitness.com](http://www.visionfitness.com).
